

# EPPO Plant Protection Thesaurus

## EPPT

Welcome to EPPO Plant Protection Thesaurus (EPPT)

<b>Home</b>	The EPPO Plant Protection Thesaurus (EPPT) covers organisms important in agriculture and crop protection: crops, pests (including pathogens and weeds), natural enemies, and organisms used in ecotoxicological studies. EPPT
<b>Search</b>	includes the core data files of the Bayer codes which were previously available as a set of books or data files. This coding system is now managed by EPPO and Bayer codes can now be called EPPO codes.
<b>News/modifications</b>	For each organism EPPT provides:
<b>Licensed user</b>	<ul style="list-style-type: none"><li>• <b>preferred scientific name</b></li><li>• <b>EPPO (Bayer) code</b></li><li>• <b>other scientific names</b></li><li>• <b>common names in many languages</b></li><li>• <b>taxonomic relationships and other classifications</b></li></ul>
